Al Ain University researchers are among the best researchers in the world

The results issued by the Stanford University showed the classification of Prof. Haitham Bani Salama and Dr. Moayad Al Oqaili from the College of Engineering at Al Ain University among the top 2% of researchers in the world whose scientific research has the highest percentage of references and citations at the global level for the year 2019.

Prof. Bani Salama's research is concerned with future generations of wireless communication networks, the Internet of Things, and designing communication protocols for the fifth generation of wireless networks. While the researches of Dr. Al Oqaili focus on the artificial intelligence, machine learning, blockchain technologies, and autonomous vehicles.

This list includes researchers from all over the world and it is classified based on their specializations, self-citations, impact and full job performance throughout their careers.

Prof. Ghaleb El Refae, AAU President commented that; this achievement comes as a continuation of the progress achieved by Al Ain University at the international level during this year, as the university is working in accordance with its strategic plan which aims to attract scholars and researchers with academic and scientific expertise.
