About the College

The College of Engineering (CoE) offers Bachelor of Science degrees in six programs: Computer Engineering, Networks & Communication Engineering, Software Engineering, Computer Science, Cybersecurity and Civil Engineering. These six programs prepare graduates for careers in industrial, governmental, and academic sectors.

The CoE is focused on providing its graduates with training and skills critical to succeed in a real-world environment characterized by high competitiveness, increased complexity, and limited opportunities. Our faculty is a diverse community of talented multilingual and multicultural individuals committed to excellence in education, research, and community engagement. We invite you to visit the college to meet our faculty and learn more about us.
